

WATER LINE BREAK UPDATES

Monday, February 21, 2022
12 noon

Crews continue working round the clock to finalize repair of major leak on primary water line supplying South Laredo. Flushing also continues as a critical step to ensure water pressure is stabilized. We will provide updates as they become available.

We continue to ask residents that do have the service for their cooperation, conserving water by not using washing machines, dishwashers, or watering the lawns. Thank you.
