A. On the application of Entex, Inc. to increase gas rates by 10.3%. This hearing was originally scheduled for August 18, 1986 and then deferred to September 3, October 6, October 20, 1986, and December 1, 1986. On August 18, 1986, R.W. Beck and Associates was employed to review the request. After several lengthy meetings and review of numerous documents by the consultant and City staff, the Company has requested in writing that its application be withdrawn so that they can complete a more detailed analysis of depreciation. At a later date, the Company will probably submit a new application for City Council consideration.

City Manager Marvin Townsend explained that the Company's position is stated in a letter from Entex to City Council. They have withdrawn their application at this time.

Councilman Trevino stated that although a consultant was employed no report has ever been given to Councilmembers.

City Manager Marvin Townsend indicated that a report would be forthcoming if and when Entex submits a new application. He further indicated that a depreciation analysis would probably take from 4 to 6 months. City approved payment to consultant not to exceed $30,000 with Entex to reimburse.

Councilman Juarez inquired that while there is no increase at this time, could rates decrease in the future.

City Manager Marvin Townsend explained that the dispute is between consultant's figures and company's figures. There was no increase or decrease justified. The Company would have the right to appeal City Council's decision to the Railroad Commission. Consultant will proceed if Company presents new figures.

Ordinance Introduction: Juarez

G. The City's retirement program be improved by allowing up-dated service credits (retirement based on last 3 completed years of service), increasing the City's contribution from 1 to 1 match to 1 1/2 to 1 match of employees payments, modifying health and life insurance for retirees at City expense by excluding those employees who leave City employment prior to being elgible to retire but after they have vested and those employees who are elgible for medicare, who retire after January 1, 1987.

At present the City contribution on a 1 to 1 basis is 3.99% of salaries. Employees contribute 3% and the City matches the 3% plus .99% for prior service, with an amortization period of 20 8/12 years.

Under the 1 1/2 to 1 matching ratio, and including updated service, the City's contribution will be 5.16% with an amortization period of 25 years. The 1986-87 cost will be paid from the Retirement Fund, as well as a substantial part of the cost for 1987-88.

On February 20, 1981 the City Council passed an ordinance to grant "City employees who retired from City employment under the City Pension Plan between July 1, 1980 and the date of enactment of this ordinance and all City employees retiring from City employemnt under the City Pension Plan from this date of enactment on shall be granted Health Insurance and a Life Insurance Policy in the amount of $2,000, at no cost to the retiree." There is no indication how this benefit was extended to firemen with a different retirement program, policemen under the Texas Municipal Retirement System, or City employees under the Trans-America plan. The City Pension Plan provided very small retirement benefits for employees at age 70 with no other City retire-ment plan.
